Responsible Drink-Drive Decision Making :

Single Use Self-Test Alcohol Breathalyser

The Product

- ◇ Redline is a single use, preliminary non-evidentiary self-test screening device which provides a guide to a person's Breath Alcohol Content.
- ◇ It provides an indication of blood alcohol concentration against an indicator of the 0.05% BAC drink-drive limit. Appropriate user instructions, warnings and disclaimers are contained in the Instruction leaflet.

Product Quality & Australian Standard Certification

The Road Safety Act – Section 74A – states that such instruments (breathalysers) sold must “comply with the Standard (AS3547).”

The Redline breathalyser is a Certified Product in accordance with the accuracy and reliability requirements of Australian Standard AS 3547 1997 - Breath Alcohol Testing Devices for Personal Use, Type 1 (single use, disposable).

It is the only single use, disposable breathalyser with Australian Standard Certification.

About Redline

Manufactured in South Africa by Redline products of Cape Town, over 100 million Redline breathalysers have been made since 1986. The manufacturing process is in accordance with ISO 9001.

Redline breathalysers are currently supplied to over 30 countries, including the police forces of France, Spain, Italy and Israel for use as a preliminary screening device. The supply to Securite Routiere (the French Government's road safety body) has been on-going for 15 years.

Meeting International Standards

Redline also meets the French NF standard, German TUV, Spanish ESR and others. Redline has been accepted by the NZ authorities and has also received FDA approval in the USA.
